CONSTRUCTION METAL SALES LIMITED (CMS) IS A WHOLLY OWNED SUBSIDIARY OF A MAJOR PRIVATELY OWNED UK GROUP THAT HAS BEEN IN OPERATION SINCE THE 1970'S. THE GROUP WHICH CONCENTRATES ON THE DEVELOPMENT, MANUFACTURE AND INSTALLATION OF CONSTRUCTION PRODUCTS HAS A STRONG REPUTATION WITHIN THE INDUSTRY.

CMS AND ITS SISTER MANUFACTURING COMPANY CONSTRUCTION METAL FORMING LIMITED (CMF) HAVE COMBINED TO BRING THE GROUPS FULL RANGE OF COLD FORMED STEEL PRODUCTS TO THE CONSTRUCTION MARKET.

In January 2023, following on from over £20,000,000 worth of investment CMF further expanded its manufacturing capacity with the completion of its new production facility at Magor, South Wales. This facility provides an additional extensive manufacturing floor area of 80,000 square feet. CMF Magor has several CNC roll forming lines with over 30,000 tonnes per annum of capacity.

- All our MetModular sections are produced on machines that allow standard holes, slots and countersunk holes to be punched anywhere on the section.
- Having the ability to roll sections up to **500mm deep**, in gauges from **0.7mm** to **5.0mm** and up to **18 metres in length**.
- By standard our sections are supplied in a high strength S450 + Z275 grade, however low carbon steel, Magnelis, G600 and other specialist grades are available (subject to MOQ).
- Quality focus throughout the organisation.
- Full traceability with CE marking.
- ISO9001, ISO14001 & ISO45001 certified.

Along with our mills we also hold a XS Fibre Laser Cutting Machine that offers lasercutting into sheets up to 20mm in thickness to ensure we are competitive with components such as cleats.

- Sections available on Tekla with standard profiles available on Tekla export tool.
- Support available at all stages of design.
- Sections can be manufactured to suit requirements.
- Over x300 of our sections available on Tekla.

As the commercial arm of CMF, CMS supplies a variety of products including metal decking, cladding, purlins, rails, mezzanines, modular and cold-rolled portal frames. Providing the one of the UK's largest range of C, Z and Sigma profiles, CMS offer light gauge solutions for urban, industrial and agricultural developments among others.

Our sections have been fully tested at the Building Research Establishment (BRE) and ratified by the Steel Construction Institute (SCI).
